

CPSWQ EXAM REVIEW COURSE and EXAM (Certified Professional in Erosion and Sediment Control)

PURPOSE OF PROGRAM

The CPSWQ program is designed for individuals actively involved in the following storm water management activities:

- Compliance with construction and post construction storm water management.
- Design and Review of SWPPP and SUSMP (post construction Storm Water Management) plans.
- Installation and inspection of storm water management practices.
- Related activities (such as, assisting regulators, authoring handbooks, and educating the public).

For information on the benefits and process for certification, see www.envirocertintl.org and California NPDES adopted General Permit http://www.waterboards.ca.gov/water_issues/programs/stormwater/constpermits.shtml

Approval by CPSWQ, Inc. is required to sit for the exam. Certification is obtained via a specific process. For more information visit: www.cpswq.org
