The EnviroTech NPDES Review Course will be attended by applicants seeking certification and those seeking ongoing stormwater training. The course will also be of interest to owners, operators, employees, designers, inspectors, purchasers and others interested in expanding their knowledge in stormwater management and water quality protection. Any individual may register to attend the Review. Only approved applicants may sit for the exam. The Qualifying Examination will be based on material covered in the Review Course.

COURSE TOPICS:

- Erosion and Sediment Control Principles and BMPs
- Hydraulic Applications
- Establishing Vegetation
- Material and Product Knowledge
- Non-stormwater BMPs
- Materials and Waste Management BMPs
- Inspection and Maintenance Requirements
- Regulations
