

# GENERAL NPDES TRAINING

*Are you ready for the rainy season?*

AEI-CASC has developed storm water training classes that are practical, current and enjoyable. Our instructors have trained over 10,000 people, performed over 5,000 compliance inspections and written nearly 500 SWPPPs. This is what some of our students say:

*"The speaker was excellent. His examples and explanations were all relevant to the actual conditions encountered on a day to day basis, and I left feeling energized about the whole program."*

- April Penera, Assistant Deputy Director, Engineering and Capital projects City of San Diego

*"The NPDES regulations were new to me, the instructor presented the material in such a manner that even a beginner like myself could understand them."*

- Jim Bradley, Riverside Construction Company

## **COURSE TOPICS:**

- **History of NPDES regulations**
- **Recent enforcement actions**
- **BMP selections**
- **Proper BMP installation**
- **Proper documentation**
- **Sampling & testing**

This is the same course AEI-CASC provides to the BIA, AGC, and other local agencies.

Advanced classes in the following areas are also available:

- **Sampling and Analysis**
- **Advanced BMPs**
- **BMP Inspections**
